Hours of Operation: Monday to Friday 8.30am - 5.00pm | Saturday 8.00am - 1.00pm

(MRI is also available 5pm-9pm Mon-Thurs and on weekends by appointment)

Please phone to arrange an appointment or email us and we will contact you with a convenient time and day. Please email the front of this form prior to your appointment.

Envision Medical Imaging is a private billing practice with payment required on the day of your examination.

**Free Parking** is available at the rear of the building.

**Please note:** Due to a traffic island you cannot turn right into Connolly Street if heading West on Cambridge Street.

If using Public transport there is a **bus-stop** immediately in front of our building (Route No. 81, 84, 85, 91, 92, 95) Subiaco train station is less than a 5 minute stroll.

## MRI Patient Information

You have been referred to Envision to have an MRI (Magnetic Resonance Imaging) scan. We take pride knowing that your imaging will be done on one of our modern wide-bore, high quality 1.5T or 3T scanners. In combination with our friendly staff, the whole experience will be far more comfortable for you, virtually eliminating claustrophobia. Most importantly, the excellent image quality allows for accurate diagnosis by our specialist MRI Radiologists.

The MRI scanner will make various tapping or buzzing noises as part of the normal process of acquiring your images. A scan of a single region generally takes between 15 - 25 minutes, though some more complex studies can take a little longer.

MRI does not use ionizing radiation like X-rays or CT scanning. The MRI scanner is however, a very powerful magnet so some patients with certain implants or metallic/electronic devices cannot have an MRI scan.

**PLEASE CONTACT OUR HELPFUL MRI STAFF PRIOR TO BOOKING AN APPOINTMENT WITH ANY QUESTIONS, OR IF YOU HAVE ANY OF THE FOLLOWING IMPLANTED DEVICES**

**(08) 6382 3888**

| | |
|---|---|
| Pacemaker/Defibrillator | Neurostimulator |
| Cochlear Implant | Stapedectomy (Inner Ear) |
| Aneurysm Clip | Morphine/Insulin Pump |
| Programmable VP Shunt | Multiple Coronary Stents |

Any surgical implant that has been in situ less than 6 weeks

Most metal screws, clips & rods used in surgery are safe to be scanned as they are made of titanium (non-magnetic), but we will ask you about these on the day of your scan. You may be required to remove jewellery prior to your scan.

## MRI Fee Information

Full MRI Licence on the 3T scanner – Medicare rebates available for Specialists and GP referred eligible MRI scans.

Please send your referral to mribookings@envisionmi.com.au to enable us to provide you with an accurate quotation including any Medicare rebates that may be available.

Please note that payment will be required on the day of your examination.
